SWISS ENGINEERING STORMS THE GOTTHARD

A 3/5 series 200 and 900

DELIVERY Q4 2026

Photos of the painted prototype – the production model may differ slightly.

THE EDITION

LIMITED EDITION
160 units

VERSIONS
11 (10 available)

MANUFACTURING
Entirely handmade

MATERIALS
Brass, stainless steel, bronze

CONTROL
DCC sound decoder ESU LokSound V5

MINIMUM CURVE RADIUS
420 mm (R2)

FEATURES OF THE SCALE MODEL

- Detailed driver's cab
- Opening smokebox door
- Ref. 2278 — Prototype, short wheelbase, large running plate
- Ref. 2278a — Locomotive from the Swiss National Exhibition in Geneva, 1896
- Ref. 2278/4 — 4th series, straight running plate
- Ref. 2278/5 — 4th series, exhibition locomotive "Milano", with decorative lines and GB lettering

HISTORY OF THE ORIGINAL

From 1896 the Gotthardbahn's A 3/5 was "on everyone's lips": the locomotive was presented to the public for the first time, "hands-on", at the second Swiss National Exhibition in Geneva. It showcased above all the booming national industry and the construction sector, in Switzerland and across Europe.

The A 3/5 no. 202 was, both technically and in its unaccustomed elegance, a milestone of the exhibition and of the Swiss Locomotive and Machine Works (SLM) in Winterthur. After successful trial runs and tests with the prototypes nos. 201 and 202, the Gotthardbahn ordered 28 four-cylinder locomotives, delivered in four batches up to 1905. The first production locomotives worked from the depots at Erstfeld, Bellinzona and Biasca, notably at the head of the GB's famous luxury train with blue passenger cars.

All were taken over by the SBB/CFF and carried the 900-series numbers (nos. 901–930). From 1926 the machines were gradually withdrawn and in part sold abroad. Sadly, no example has survived.

Crafted from brass following a meticulous study of historical archives, every Fulgurex model aims for fidelity down to the smallest detail, for the pleasure of seeing it come to life on your tracks.
