LIMITED EDITION
150 units

VERSIONS
6

MANUFACTURING
Handmade

MATERIALS
Brass

MINIMUM CURVE RADIUS
420 mm

FEATURES OF THE SCALE MODEL

- Designed for the BEMO system

HISTORY OF THE ORIGINAL

The ASD had 12 freight cars divided into types K, L and M, originally gray with black framing and gradually repainted red from the 1970s. In 1942, as the planned connection to the MOB had not been realized, the ASD abandoned the Hardy vacuum brake in favor of the Westinghouse air brake, to be compatible with the rolling stock of the AOM and MCM railways.

Crafted from brass following a meticulous study of historical archives, every Fulgurex model aims for fidelity down to the smallest detail, for the pleasure of seeing it come to life on your tracks.
