MANUFACTURING
Handmade

MATERIALS
Brass, stainless steel, bronze

CONTROL
DCC decoder ESU

MINIMUM CURVE RADIUS
420 mm (R2)

FEATURES OF THE SCALE MODEL

- Ref. 2291 — First original version, full blue sheet-steel boiler cladding, cylinders and dome
- Ref. 2291/1 — Blue sheet-steel boiler cladding, gray boiler bands, Solothurn shooting festival
- Ref. 2291/2 — Blue sheet-steel boiler cladding, black cylinders, dome and smokestack
- Ref. 2292 — Full blue sheet-steel boiler cladding, Division 3
- Ref. 2292/1 — Blue sheet-steel boiler cladding with black bands
- Ref. 2292/2 — Black boiler, Division 2

HISTORY OF THE ORIGINAL

To be able to use the proven Mallet locomotives Ed 2x2/2 on the main lines of the SCB as well, for example Bern–Aarau–Rotkreuz, a larger boiler was fitted and the locomotive was given a tender with the necessary supplies. The locomotive thus became the SCB D4T, and then the SBB/CFF D 2x2/2.

In the years of the follow-up order (1897 to 1900), 12 locomotives of this type were built in Winterthur. This Mallet tender locomotive was mainly used on long freight trains. It delivered 800 hp and had a top speed of 55 km/h. As was usual at the time, the locomotives were fitted with a blue-sheet boiler (in part also in the later SBB versions). The tender was taken over from the A 3/5 of the 200 series.

All the machines were taken over by the SBB (nos. 4601–4612), but they were fairly quickly displaced by the C 4/5 of 1904.

Crafted from brass following a meticulous study of historical archives, every Fulgurex model aims for fidelity down to the smallest detail, for the pleasure of seeing it come to life on your tracks.
